### **Spireon Releases Modular Trailer Tracking Solution**

Spireon, the vehicle intelligence company, has released the industry's first modular trailer tracking solution, FL Flex, the latest in its FleetLocate® product line. Spireon's FL Flex enables a mixed fleet to deploy a single, small footprint device across its full range of trailers, and then customize the unit to meet the specific needs of each asset. By configuring FL Flex with options such as door, cargo, temperature and other trailer sensors, as well as solar panels to maximize up-time, fleets can streamline and accelerate the deployment of mission-critical asset management capabilities across their business.

"Premier Trailer Leasing believes in outfitting its trailers with the best technology. FL Flex's modular design and long life supports many configurations, including solar, giving us actionable real-time trailer data that our customers demand," said Jim AuBuchon, CEO of Premier Trailer Leasing. ### **Peterbilt Introduces New UltraLoft 80-in. Integrated Sleeper**

Peterbilt Motors Co. today introduced the Model 579 UltraLoft 80-in. integrated sleeper variant of its flagship on-highway truck, looking to offer an unmatched level of comfort and convenience for over-the-road drivers and a more efficient truck as well.

The new model is designed to offer the best possible living and working space for those drivers who spend a majority of their time in the truck, often for days or weeks at a time. The Model 579 UltraLoft has a floor-to-ceiling distance of more than 8 ft. and offers up to 70 cu. ft. of storage capacity

throughout the cab and sleeper, for instance, with a premium coil-spring 42-in. by 85-in bottom bunk and available 36-in. by 82-in. top bunk that features a split-fold design so it can fold in to provide extra storage space. [Click here for more information.](#)
