

FleetLocate Solar-Powered Trailer Tracking

FleetLocate's FL Solar trailer tracking device leverages state-of-the-art solar-harvesting technology with a powerful processor that maintains its pulse on trailer activity with minimal current. The FL Solar provides quick and easy installation under 15 minutes, and leverages sophisticated engineering that outperforms the competition.

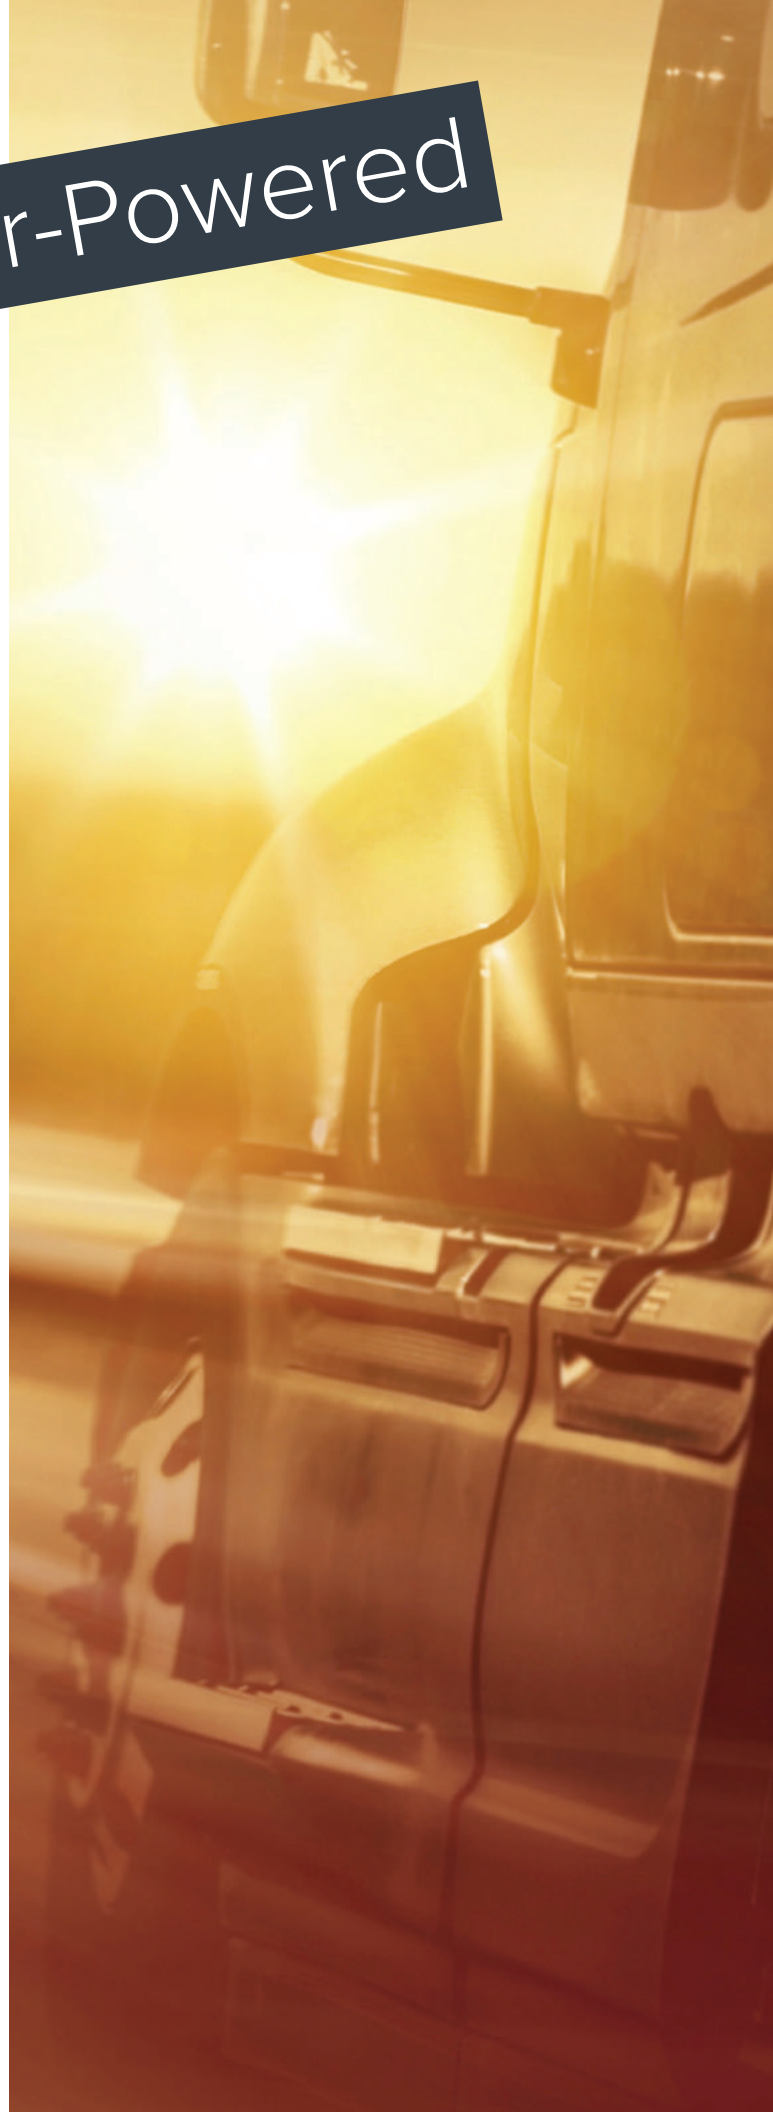

BENEFITS

Pinpoints the location of any asset or trailer whether it's moving or not

- > Alerts when trailer is on the move
- > Alerts when trailer breaks a landmark boundary
- > Provides peace of mind for infrequently used and unpowered assets that inventory is where it's supposed to be
- > Simplifies yard management
- > Optimizes asset utilization
- > Ensures accuracy of detention billing
- > Tethered and untethered options tailored to fit your needs:
 - Untethered offers quickest 15-minute installation, power save script to reduce battery consumption on the road
 - Tethered supports a still speedy 30-minute installation, and paves the way for GPS mileage tracking, asset speed tracking, and tractor on/off reporting
