- Corporate financial strength and stability
- Bertram Capital majority interest
- Extensive partnerships with leading OEMs
- Active member of industry associations

Trailer Tracking Solutions that Deliver Actionable, Real-time Business Intelligence.

BUILT FROM THE GROUND UP FOR TRANSPORTATION COMPANIES.

The Transportation industry is made up of For-Hire fleets, Private trucking fleets and Trailer Leasing companies. Spireon's solution target assets and trailers hauled by Class 8 tractors.

The main concerns facing companies in the business of hauling goods today are driver shortages, government regulations, fluctuating fuel costs, increased competition, and shrinking margins. To meet these challenges, FleetLocate provides expanded visibility into your company's trailer fleet, which results in increased efficiencies and the ability to maximize capacity. The return on investment for GPS trailer management solutions is proven, and in use today by the most successful fleets.

At Spireon, we know that fleet operators are looking for trailer tracking solutions that will improve trailer utilization, reduce operating costs, increase the number of turns per trailer, and streamline maintenance practices – all while increasing operational productivity and making management of their fleets easier!

Rich Data Optimized for Performance

Maximize Your Trailer Workforce

Don't just manage your trailer fleet. Maximize it with FleetLocate's Trailer and Asset Tracking solution. Innovative and easy to use, FleetLocate combines the Rich Data, powerful features and cost efficiencies of Global Positioning Systems (GPS), Mobile Resource Management (MRM), and Software-as-a-Service (SaaS) technology to arm you with:

- Time and motion reporting
- Real-time trailer location
- Actual GPS trailer mileage
- Exact historical trailer travel history
- Idle trailer reporting
- Trailer heading and speed
- Tractor power connect and disconnect alerts
- Automated trailer pool management
- Automated yard management
- Detention reporting and billing tools
- Integrations with leading TMS solutions

The FleetLocate trailer management solution delivers actionable, real-time business intelligence to help increase your bottom line and get more out of your assets and drivers.

State-of-the-Art Trailer Tracking Technologies

FL12

- Optimal solution for multiple trailer types:
 - Dry Van
 - Flatbed
 - Step-Deck
 - Tanker
 - Open Top
 - Chassis
- Included sensors:
 - Motion
 - Power Connect
- Optional accessories: Door Sensor
- Multiple installation options

FL14

- Optimal solution for one-way temperature monitoring:
 - Temperature probe measures reefer return air temperature
 - Temperature alerts/reports including chain of custody and TCU
 - 5-minute reporting when Fridge ON
 - Fridge ON/OFF Alerts
- Included sensors:
 - Motion
 - Temperature probe

FL Solar

- Optimal solution for assets with power management challenges:
 - Trailers that side idle for long periods
 - Assets with no access to traditional power
 - High performance assets with need for long life battery
- Included sensors:
 - Solar recharge
 - Motion

FL22

- Optimal solution for trailers requiring custom configurations:
 - Universal pan allows flexible installation options
 - Tamper sensor discourages theft
- Included sensors:
 - Motion
 - Tamper alert
- Optional accessories: Cargo Sensor, Door Sensor

FL22+

- Builds upon FL22 technology with integrated solar:
 - Embedded solar panel extends battery life
 - Smaller footprint
 - Faster installation
- Included sensors:
 - Solar recharge
 - Tamper alert
 - Motion
- Optional accessories: Cargo Sensor, Door Sensor, Solar Panel
