

## TRAILER & ASSET INTELLIGENCE

# Only FleetLocate Provides Rich Data for Trailer Management.

Access to an unprecedented level of trailer information in real-time allows you to manage your fleet operations by exception. Now you can make faster, smarter, more profitable decisions about your trailer operations, and your business.

FleetLocate provides actionable business intelligence that drives efficiencies and results. The FleetLocate Trailer Management user interface is customizable, intuitive and user friendly. It has evolved based on the needs and requests of our customers and years of experience serving in the trucking industry.

### With FleetLocate, You'll See:

- Which trailers are moving or stopped (either in or out of a landmark)
- How many miles each trailer has traveled
- Estimated time of arrivals
- Unauthorized use of trailers or route deviation
- Opportunities to bill for detention
- Historical trailer route

### Real-Time Business Intelligence at Your Fingertips

FleetLocate is simple to work with and easy to learn, yet infinitely customizable for the power user actively monitoring multiple asset groups at once. It contains a robust set of tools to accommodate virtually any need.

### Monitor and Measure Your Trailers, So You Can Improve Efficiencies

FleetLocate's Rich Data lets you measure the performance of your trailers – you'll see where you're losing money, and how to control costs. FleetLocate give you the visibility you need to:

- Automated trailer pool management
- Increase loads and turns per trailer
- Optimize your trailer inventory at key locations
- Increase the number of turns per trailer
- Right size your fleet

## Driving Efficiencies

With expanded visibility of your trailers comes increased efficiencies. FleetLocate easily connects you by exceptions to the Rich Data that allows you to:

- Increase trailer utilization so you can do more with less
- Redirect underused trailers to locations with higher demand
- Encourage customers to unload your trailers first
- Empower dispatch and maintenance to respond more quickly and efficiently

## Exception Notifications and Alerts are Provided and Are Configurable by the User

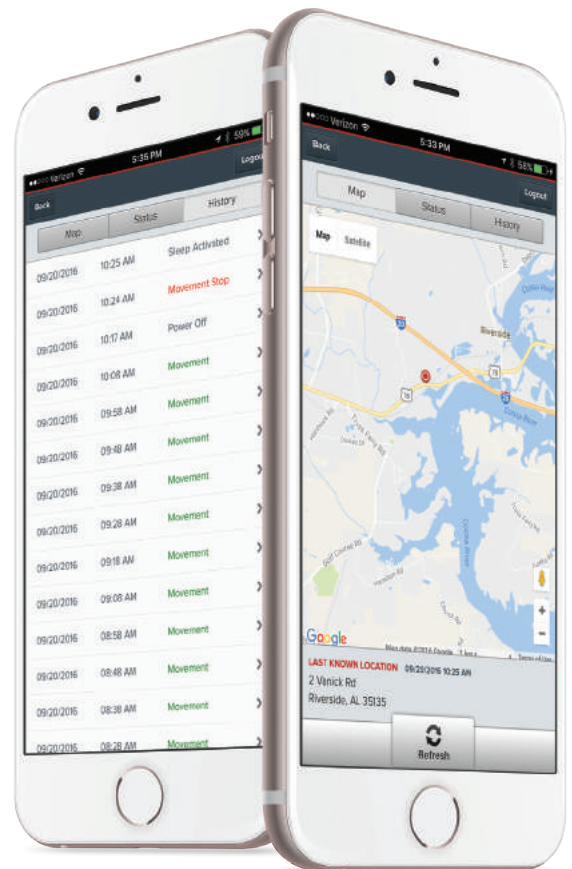

- Enter or exit a geofence
- Tractor power on/off
- Inactivity alerts
- Landmark arrival
- Low internal battery – an alert to notify battery charge is low
- Temperature out of range
- Detention grace period exceeded

## Intelligence You Can Use

FleetLocate delivers actionable business intelligence you can use to make more profitable operational, dispatch, maintenance and business decisions. Flexible, customizable reports for managers and executives, exception-based reporting and alerts triggered by specific events, such as trailers leaving or entering a geofences. PAR Trending allows you to identify the optimal number of trailers needed at each location.
