

# FleetLocate Temperature Monitoring

FleetLocate Temperature Monitoring (FL14) is an affordable option to high-priced reefer solutions and keeps you compliant with Food Safety and Modernization Act (FSMA) regulations. Our solution provides remote real-time temperature monitoring that lets drivers focus on driving rather than watching for a temperature warning light or missing a potential problem altogether.

## Benefits

- > Stay compliant with FSMA rulings that require food to be transported at correct temperatures
- > Save resources with a value-priced solution with one-way communication to keep costs down
- > Easily provide temperature reports for your customers and in the event of an audit
- > Pinpoint the location of any refrigerated trailer whether it's moving or not.
